authorities, inquiries from stakeholders (parents, children, residents) or in response to legal proceedings. When responding to an Order from a court or regulatory agency, particularly one that requires the cessation of use of water outlets pending sampling and reporting, the cost impacts and disruption to routine operations can be substantial.

Keating Environmental's services have been provided in response to Orders from regulatory agencies, as part of an impending purchase or lease agreement, as well as in response to a pro-active risk management strategy. Services that we have provided include:

- Comprehensive program management, including "turn-key" services.
- Development of customized, comprehensive sampling and Implementation plans.
- Collection of water samples, laboratory management, and documentation.
- Evaluation of plumbing configurations and problematic situations.
- Evaluation of treatment alternatives, including chemical treatment, point-of-entry and point-of-use treatment devices.
- Selection and implementation of remedial actions.
- Establishment of protocols for plumbing modifications, (selection of materials, methods, etc.).
- Reporting and interfacing with regulatory agencies and others.
- Public relations and press conferences, including stakeholder outreach programs.
